*Presents*

# THE NIEMEYER LECTURE

SEPTEMBER 21, 2012

NOON - 1 P.M.

ADAMS CONFERENCE CENTER

## **Simultaneously Advancing Animal and Human Health Through Translational Research**

Lisa Fortier is an associate professor of surgery at Cornell University in Ithaca, NY. She received her DVM from Colorado State University and completed her PhD and surgical residency training at Cornell University. She is boarded-certified with the American College of Veterinary Surgeons and is an active equine orthopaedic surgeon at Cornell. Her laboratory studies the intracellular pathways involved in the pathogenesis of osteoarthritis, with particular emphasis on post-traumatic osteoarthritis. In addition, Fortier's research program investigates the clinical application of stem cells and biologics such as PRP for cartilage repair and tendonosis. She has received the Jaques Lemans Award from the International Cartilage Repair Society, the New Investigator Research Award from the Orthopaedic Research Society, and the Pfizer Research Award for Research Excellence from Cornell University. Fortier is the vice president of the International Veterinary Regenerative Medicine Society and the immediate past president of the International Cartilage Repair Society.

This presentation is made possible by the Kenneth and Margaret Niemeyer Visiting Lecture Fund. Kenneth and Margaret Niemeyer established the fund in 1986 to defray the expense of bringing individuals to the CVM to deliver scientific lectures to veterinary students, faculty and other interested individuals. Kenneth Niemeyer was a 1955 graduate of MU CVM. He was a long-time College faculty member who also served as associate dean of academic and student affairs until his retirement. Dr. Niemeyer passed away in December of 2011.

We are pleased to offer one hour of continuing education credit recognized by the Missouri Veterinary Medical Board for attendance at this seminar. Practicing veterinarians and certified veterinary technicians are welcome to attend and will be provided with a certificate of C.E.

To defray the cost of C.E. certification, attendees are requested to donate \$25 (paid by check to the University of Missouri – Silent Partners Fund). This fund helps offset the cost of care for animals whose owners have demonstrated financial difficulty, but whose pet's health could be significantly improved with veterinary care.
