MINIMUM STANDARDS FOR PRE-VETERINARY AGSCHOLARS

1. Maintain a cumulative GPA of at least 3.30 or better in MU classes (semesters where a student is enrolled as a part-time student will not be used in the calculation of cumulative GPA). If a student fails to maintain a 3.30 cumulative GPA, he or she will have two successive full-time semesters to improve cumulative GPA to 3.30 or better. If the student’s cumulative GPA falls below the program minimum of 3.30 a second time, it will result in automatic dismissal.

2. Required courses for admission must be taken at MU in Columbia (60 hours). Elective courses may be taken elsewhere in summer, but grades will not be used in calculating the required cumulative GPA.

3. Make a B- or better in the 60 hours of required preprofessional courses. If more than one grade of a C or lower is obtained in any required course, a student will be dismissed from the program. A single failing grade in any required course will result in dismissal. Note: This academic requirement also applies to the general and organic chemistry requirements for Biochemistry 3630.

4. Enroll as a freshman in the animal science bachelors of science degree program at the University of Missouri, complete all required courses listed in the AgScholars pre-veterinary curriculum (see list on reverse).

5. Maintain an average course load of 15 hours per semester (fall and spring only), exclusive of AP, CLEP, or advanced standing course hours.

6. Acquire at least 250 contact hours in high school or college observing a clinical veterinarian(s) practicing the profession. No more than 100 of the required 250 hours is allowed to be completed in the University Veterinary Health Center.

7. Take the Graduate Record Examination (GRE) General Test. The minimum required score on the GRE general test is 310, adding the quantitative and verbal scores together. A minimum of 3.5 is required on the analytical section.

8. Meet with mentor the first month of every enrolled semester: Fall (September) and spring (January).

9. Become and remain an active member of the Pre-Veterinary Medicine Club and attend at least 10 meetings per year.

10. Meet minimum attendance and participation requirements for supervised observation in the MU Veterinary Health Center. These clinical rotations do not meet the requirement for experience with veterinarians as required in item 6.

11. Complete the program within four years. *If a student submits an application to the College of Veterinary Medicine independent of the AgScholars Program, prior to meeting the minimum program standards, and is unsuccessful in gaining admission, that student forfeits placement in the AgScholars Program.

The University of Missouri does not discriminate on the basis of race, color, religion, national origin, ancestry, sex, age, disability or status as a disabled veteran or veteran of the Vietnam era. For more information, call Human Resource Services at 573-882-4256 or the U.S. Department of Education, Office of Civil Rights.

The University of Missouri complies with the Americans with Disabilities Act of 1990. If you have a disability and need accommodations, please notify us at 573-882-1902 as soon as possible, so that necessary arrangements can be made. TTY users: please call through Relay Missouri, 800-735-2966.

FOOD ANIMAL FACULTY AT THE MU CVM

The MU College of Veterinary Medicine has a large and talented food-animal faculty that includes diplomates of the American College of Veterinary Internal Medicine, the American College of Theriogenologists, the American Board of Veterinary Practitioners, and the American College of Veterinary Preventive Medicine. Board certification in these disciplines indicates a high level of clinical competence and specialization.

This extra training improves the quality of service to the animal-owning public and education at our college. In addition to clinical training, many of our food-animal faculty have completed graduate degrees and are involved in research programs in neonatal immunology, mastitis, reproductive biology, infectious livestock diseases, pharmacology, and nutrition.
AgScholars Program

OVERVIEW

This program provides early assurance of admission to the MU College of Veterinary Medicine to selected students pursuing undergraduate animal science studies at the University of Missouri.

Objectives

• Guarantee acceptance into the MU College of Veterinary Medicine upon satisfactory completion of the program’s undergraduate requirements at MU.
• Develop a mentoring relationship between animal science students and MU College of Veterinary Medicine faculty.
• Facilitate student involvement in research and clinical activities in livestock medicine.
• Enable students to receive a bachelor of science degree with three or four years of undergraduate work while simultaneously pursuing their professional studies.

Eligibility

• High school seniors and MU freshman with an ACT composite score of 27 or more, or an equivalent SAT score.
• Applicants must have demonstrated experience in livestock production and health. Examples of appropriate experience may include participation in a livestock enterprise as either a family member or employee; enrollment in at least two years of high school agricultural coursework; and participation in FFA, 4-H, or equivalent organizations with projects directly related to livestock production or health; or completion of an internship of at least 250 supervised hours working in livestock production or a livestock health enterprise prior to applying for program admission.

Selection

Selection is based on applicants meeting the academic eligibility requirements, academic performance, evidence of leadership, extra-curricular activities and community involvement. U.S. citizenship or permanent residency is required.

Activities

Meetings are required between scholars and mentors, during which mentors will review the progress of scholars, offer advice, and answer questions. Mentors also alert scholars to events in the MU College of Veterinary Medicine that scholars may attend or assist. Scholars will be informed of research activities in the college and, when possible, offered the opportunity to participate in research projects as an assistant. Scholars assigned to clinicians may be able to attend case rounds and observe diagnostic or surgical procedures. A pre-veterinary medical agricultural scholar organization arranges special demonstrations or presentations by veterinary medical faculty in various areas of specialization to all interested scholars.

Timetable

Deadline for application:
• High school seniors: April 1
• University of Missouri first-time freshmen: September 15 and/or April 1 of MU freshman year.

Notification of selection occurs soon after application deadlines.
